

FELLOWSHIP IN CLINICAL OPTOMETRY

 Chandrababha Eye Hospital,
Jorhat, Assam

Are you a passionate optometry graduate looking to enhance your clinical expertise? Our 6-month Fellowship in Clinical Optometry offers hands-on training in advanced diagnostic techniques and patient management

Gain comprehensive knowledge and skills in:

1. Comprehensive Clinical Exposure

You will be actively involved in general investigative procedures essential for diagnosing and managing various ocular conditions. This includes working with state-of-the-art ophthalmic instruments to perform advanced eye examinations.

2. Specialty Clinics

- Contact Lens & Low Vision Clinic – Gain hands-on experience in fitting and managing contact lenses for different refractive and medical conditions. Learn about low vision assessment and rehabilitation strategies for patients with visual impairments.
- Orthoptic Clinic – Develop expertise in assessing and managing binocular vision disorders, including strabismus, amblyopia, and convergence insufficiency, using specialized orthoptic techniques.

3. Community Ophthalmology Department

- You will be assigned to the Community Ophthalmology Department, where you'll engage with local communities, conduct patient evaluations, screenings, and participate in Eye Camps to provide essential eye care to underserved populations.

4. Regular morning classes

- Stay updated with the latest advancements in clinical optometry through structured learning sessions.

Duration: 6 Months

Fee Details
50,000 INR
