

# CONTACT LENS FELLOWSHIP

Chandraprabha Eye Hospital,  
Jorhat, Assam

During the fellowship, participants will gain hands-on experience in fitting and managing various types of contact lenses tailored for different clinical needs. The program will cover specialty lens options, including scleral lenses, orthokeratology, hybrid lenses, and customized soft lenses. Participants will also learn advanced techniques in assessing corneal topography, managing irregular corneas, and optimizing visual outcomes for patients with keratoconus, post-surgical conditions, and severe dry eye. The fellowship will include interactive case discussions, live patient demonstrations, and practical workshops led by experienced professionals, ensuring a comprehensive understanding of specialty contact lens practice.

# Gain comprehensive knowledge and skills in:

## 1. Managing Various Contact Lens Cases

- Soft Contact Lenses
- Rigid Gas Permeable (RGP) Lenses
- Scleral Lenses
- Orthokeratology (Ortho-K) Lenses

## 2. Keratoconus Management

- Corneal Topography Analysis – Learning to assess corneal shape and severity of ectasia
- Specialty Lens Fitting – Scleral and hybrid lens fitting for advanced keratoconus management
- Patient Education – Guiding patients on treatment options and long-term care

## 3. Refractive Correction with Contact Lenses

- Myopia & Hyperopia Correction – Fitting single-vision lenses for common refractive errors
- Toric Lenses for Astigmatism – Understanding the fitting and stabilization of soft toric lenses
- Multifocal Contact Lenses – Managing presbyopia through advanced lens designs

Duration: 6 Months

Fee Details  
50,000 INR
